

YOU HAVE THE *RIGHT*
TO BE *LIGHT.*

EXTREME
LLC
TRAILERS

THE LOWEST TARE WEIGHTS YOU CAN FIND. *ANYWHERE.*

Haul less trailer, haul more payload. Every pound you remove that you don't need means you can carry more goods or equipment or anything that makes you money.

No matter the trailer or the size, you'll get extreme weight savings for extreme payload performance:

EXTREME PLATFORM TRAILERS
remove a **maximum of 1,800 pounds** and a
minimum of 1,000 pounds.

**EXTREME STEP
DECK TRAILERS**
reduce tare weight by
1,000 to 1,600 pounds.

EXTREME DUMP TRAILERS
have many configurations, all of
which haul the biggest payloads at
the lightest tare weights.

WE GIVE YOU *LESS* FOR YOUR MONEY.

**Less trailer weight,
less maintenance,
LESS DOWNTIME.**

You make money based on what you haul, not what holds it. Haul more, make more. Haul with more uptime, make more. Haul more on the way back, make even more.

Extreme Trailers gets rid of everything you don't need (tare weight, downtime, maintenance delays) so you can get everything you want (payload performance, better back hauls, profits).

EXTREME PLATFORM TRAILERS

*XP Platform Series =
lowest tare weights + strongest decking*

removes 1,000-1,800 pounds

35-50% stronger decking
